# Women's Server's Quarters

Work on the 12-room, 2-story Women's Server's Quarters started in April of 2024 and has continued through the year. Following the excavation and construction of a retaining wall and foundation, the framing of the building is now complete. A waterproof membrane was installed on the roof and exterior walls before work began on the interior plumbing, electrical wiring, and insulation. The building is projected to be completed by early summer of 2025. **Funds needed for completion are estimated at \$150,000.**

An Old student may donate funds for the completion of the WSQ on the CVC website:

# Essential Pagoda Repairs

Photo: Mockup of completed work

The Pagoda has been undergoing significant repairs since water damage was discovered three years ago. In addition to the ground floor perimeter awning, parts of the roof and exterior had to be replaced. The gold-colored zedis that sit atop the roof were stripped and repainted. The exterior stucco, interior repairs, and walkway resurfacing remain unfunded. **The funds needed to accomplish the remaining work are estimated at: \$185,000.**

Old students may donate for the remaining repair work:
